## How to install

### Upload and permissions

1. Download the zip file or git clone the project into your webpace
2. Create a database in MySQL and a user with all privileges.
3. Make sure that the directory 'config' is writeable
4. Make sure that the directory 'logs' is writeable

### Install Program-O

5. Navigate to `http://<yoursite.com>/install/install_programo.php`
6. Fill in the form
7. Press 'Save'
8. Check that the file `global_config.php` has been written to the 'config' directory. (If it hasn't, check the privileges on the config directory and run `install_programo.php` again).
9. Delete the 'install' folder
10. Secure the config directory and make sure that is it not writeable

### Administer the chatbot

11. Navigate to `http://<yoursite.com/admin/` and enter the admin username and password you entered during install.
12. Login and update your bot

13. Add your bot personality

14. Upload your AIML files. (You can grab the AIML files from here  
<https://github.com/fastcoding/aiml-en-us-foundation-alice.v1-6>)

## Verify

15. For a quick test upload the salutations.aiml file.

16. Navigate to `http://<yoursite.com>` and type 'Hello'.
