Upload AIML to use for the bot named ProgramO

Use this uploader to add AIML categories to your chatbot's database. You have the option to upload either individual AIML files, or ZIP archive files of up to 2MB in size. This uploader no longer performs XML validation, so you need to validate your AIML files prior to uploading them. It's **STRONGLY SUGGESTED** that you use either W3School's XML Validator, or the Program O AIML Validator. There are other XML validators available, but the W3Schools validator works well, and the Program O Validator is specifically designed to validate AIML files. Please note, however, that neither of the above mentioned validators will work with zip files.

File: [Choose File] No file chosen   ☑ Clear the database of entries from this file
Apply this file to this bot: [ProgramO ▾]   ☐ Skip AIML Validation for this file
[upload]

Help...

If your aiml file will not upload you may want to check the following.
--Make sure the folder you are trying to upload to has read/write privs on it (CHMOD 755)

--Remove any comments from the aiml
--Replace everything above the first <cattegory> with a simple <aiml> tag

--You can find alot of information on the net about writing well formed aiml.
--If you want to learn more about writing AIML [start here](#).
