Program O Installation

Hi, and welcome to the Program O version 2.6.11 installer. There's a lot to do, so let's get started. First off, let's check your server to see if Program O will run smoothly (or at all) here. Please note the checklist below. It shows the state of your PHP version, and any necessary (or recommended) PHP extensions that Program O needs. Fail indicates a missing dependency, while Pass means that dependency is good to go.

Program O Requirements Checklist

- PHP Version >= 5.4.0:   5.4.16
- PHP PDO extensions (NOTE: At least one enabled extension must be listed below)
  - PDO PDO_MYSQL extension enabled?:   Pass
  - PDO PDO_SQLITE extension enabled?:   Pass
  - PDO curl extension enabled?:   Pass
  - PDO zip extension enabled?:   Pass
  - PDO mbstring extension enabled?:   Pass

Program O folders that must be writable:

- Config folder writable?   Pass
- Debug folder writable?   Pass
- Logs folder writable?   Pass
- Sessions folder writable?   Pass
